DETAILED ACTION

Election/Restrictions

This application contains claims directed to the two following patentably distinct species of the claimed invention:

Group 1:

- 1a. The system shown in Figures 1-8, directed to a rack comprising an upper U-shaped guide;
- 1b. The system shown in Figures 9-11, and directed to a rack comprising an solid guide rod mounted to the top of said rack;
- 1c. The system shown in Figures 12-13, and directed to a rack system comprising a solid guide rod mounted to the a point below the top of said rack.

Group 2:

- 2a. The system shown in Figures 1-3, and directed to a rack comprising an uninterrupted U-shaped guide path;
- 2b. The system shown in Figure 8, and directed to a rack comprising a U-shaped bracket having a stop arm.

It is noted that Figures 4-7 and 9-13 are not relevant to either Group 2 Species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from each group for prosecution on the merits to which the claims shall be restricted if

Art Unit: 3634

no generic claim is finally held to be allowable. For example, Applicant may elect the combination of Species 1a and Species 2b, directed to a rack comprising a U-shaped guide, wherein said U-shaped guide is further limited by having a stop arm associated therewith. It is further noted that if Applicant elects Species 1c, then further limitation by a Group 2 Species is not necessary.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3634

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
